Login Tutorials – Shane Fry

Current date, for PHP

<https://stackoverflow.com/questions/9541029/insert-current-date-in-datetime-format-mysql>

<https://www.youtube.com/watch?v=X7mwcTJ6YO8>

Update images based on time (welcome message)

- For this I didn't really need a tutorial as it was a simple if and else, only thing needed was the "today.getHours()"

<https://stackoverflow.com/questions/13244939/javascript-to-output-text-based-on-users-current-time>
